

UNITED STATES DEPARTMENT OF THE INTERIOR

GEOLOGICAL SURVEY

LITERATURE POWDER DATA REFLECTIONS AND ABBREVIATED BIBLIOGRAPHY

FOR SELECTED ZEOLITES

Computer Formatted Data File

By  
Phoebe L. Hauff and Richard E. Phillips

Open-File Report 82-725  
1982

This report is preliminary and has not been reviewed for conformity with U.S. Geological Survey editorial standards.

## S U M M A R Y

This report contains the indices to and listing of zeolite mineral X-ray diffraction data compiled into a computer-accessible data file.

## SOURCES

The data were taken from literature sources. The U.S. Geological Survey takes no responsibility for the accuracy of the data itself. The detailed bibliographic citations for this data file are contained in Hayhurst and Matthias (1982). The references are listed by species in the "Species Index" section of this report. They are cross-referenced by species name and identification number in the "Alphabetical Index by Species" of this report.

## Format

The computer listing of the data file is formatted according to the standard input code described in VanTrump and Hauff (1976).

Each record contains mineral name, formula, identification number, source code (L-literature), group code

(SIZ=zeolite), crystallographic and unit cell information when available, and powder diffraction data (reflection, intensities, and hkl's).

Purpose

This data file was compiled for mineralogical research and reference by U.S. Geological Survey scientists. It is accessed by the C.O.M.I.T. (Computer Oriented Mineral Identification Techniques) system of mineral identification and characterization programs of VanTrump and Hauff (1977).
